WHO ARE WE?

Project Insights Angola is a company whose mission is to transform ideas into results, seeking to materialise and achieve objectives to the satisfaction of its partners and clients through the digital transformation of organisations and individuals in the architecture, engineering, construction, operation and maintenance (AECOM) sector.

*Transforming
strategies into
results*

MISSION VISION VALUE

MISSION

Our mission is to generate results in the digitisation of the Architecture-Engineering-Construction-Operation-Maintenance sectors, creating benefits for stakeholders.

VISION

We aim to be recognised as a local company with international quality in the integration of information, processes, procedures, and policies, and to create value for our stakeholders.

VALUE

Our enduring value is to build relationships of trust with: Professional Ethics and Conduct, Respect, Responsibility, Fairness, Integrity, and Transparency.

MESSAGE FROM THE CEO

Dear all,

Our commitment is to be a local benchmark with international quality, integrating information, processes and policies that generate value for everyone.

Our mission to drive digitalisation in the Architecture, Engineering, Construction, Operation and Maintenance sector must reflect our focus on concrete results and sustainable benefits.

Our main objective is to create innovative solutions that meet the specific needs of our customers, such as process optimisation, increased productivity and improved user experience so that, with ethics, responsibility and integrity, we build relationships based on trust and mutual respect.

It is with this vision that we will continue to innovate and create opportunities, promoting equity and positive impact in all our actions.

We appreciate the trust placed in us.

Anita Kamong M. S.

TRAINING

Unlock your talents with us beyond certification!

Project Insights Angola recognises that training is a strategic element for the development and success of any organisation. Therefore, it promotes high-quality training sessions, aligned with the best practices established by the Public Contracts Law and international standards, focusing on:

- **Management:** Project Management, Construction, Works and Contracts
- **BIM Methodology:** Modelling, BIM4D and BIM 5D, CDE and implementation
- **Planning:** MS Project, Oracle Primavera P6

STUDY AND CONSTRUCTION

Construction Construction | Renovation

Project Insights Angola also provides the following services as part of its range of activities:

- Study and preparation of BIM projects;
- Measurements and estimates using advanced BIM-based technology;
- Work plan in accordance with the Public Contracts Act;
- Quality control and reduction of errors and omissions;
- Feasibility study of architectural and construction models;
- Design and modification of shipping containers for offices and functional and versatile spaces;
- Renovation and expansion;
- Execution of contracts.

STUDY AND CONSTRUCTION

Construction Construction | Renovation

Project Insights Angola supports its clients in critical management areas such as:

- Prevention of Contractual Claims;
- Contract Performance Records (Digital Project and Contract Book);
- Work Programme Management;
- Supervision, Contract Management and Works.

DIGITAL TRANSFORMATION

Digital Transformation BIM | LiO | SmartGP | SmartPAC | AssetM

Project Insights Angola believes in innovation and digital transformation in organisations, facilitating the adoption of technologies and innovations in the AEC sector to increase efficiency and competitiveness:

- Representation in Angola of 3D and BIM Software Developers;
- Supply and operation of the Electronic Book of Projects and Contracts (LiO-SmartGP-SmartPAC).

DIGITAL TRANSFORMATION

Sustainability and Innovation

Project Insights Angola was the first Angolan company to develop Software as a Service (SaaS) to address the challenges of monitoring the execution of projects, works, services and goods, in accordance with the Public Contracts Law and Presidential Decree No. 88/18 of 6 April.

This solution offers an innovative and indispensable tool for project and contract managers of public contracting entities or their representatives.

By adopting cutting-edge technologies, stakeholders benefit from more efficient and excellence-oriented project management, covering all stages of the contract life cycle: from the initial planning phase, through execution, monitoring and control, to provisional and final acceptance.

In addition, the platform allows for in-depth analysis of the risks of deviations from the main contractual objectives, namely deadline, budget and value, strengthening strategic decision-making.

our SDGs with the adoption of BIM by our stakeholders
