

PROJECT INSIGHTS ANGOLA
DELIVERING VALUE

Project and Contract Management System (LiO[®], SmartGP[®], SmartPAC[®])

www.pmisangola.com

Project Insights Angola was the first Angolan company to develop Software as a Service (SaaS) to address the challenges of monitoring the execution of projects, works, services and goods, in accordance with the Public Contracts Law and Presidential Decree No. 88/18 of 6 April.

This solution offers an innovative and indispensable tool for project and contract managers of public contracting entities or their representatives.

In addition, the platform allows for in-depth analysis of the risks of deviations from key contractual objectives, namely deadline, budget and value, strengthening strategic decision-making.

“ABOUT THE COMPANY”

Project Insights Angola, Lda. is an Angolan company based in Luanda, Angola, formed by professionals with extensive experience in the implementation of construction, architecture, engineering, construction, operation, and maintenance projects.

*Transforming
strategies into results*

Its mission is to transform ideas into results, seeking to achieve and accomplish objectives in order to satisfy its partners and clients through the digital transformation of organisations and individuals within the architecture, engineering, construction, operation and maintenance (AECOM) sectors.

MISSION VISION VALUE

MISSION

Our mission is to generate results in the digitisation of the Architecture-Engineering-Construction-Operation-Maintenance sectors, creating benefits for stakeholders.

VISION

We aim to be recognised as a local company with international quality in the integration of information, processes, procedures, and policies, and to create value for our stakeholders.

VALUE

Our enduring value is to build relationships of trust with: Professional Ethics and Conduct, Respect, Responsibility, Fairness, Integrity, and Transparency.

“MESSAGE FROM THE CEO”

Dear all,

Our commitment is to be a local benchmark with international quality, integrating information, processes and policies that generate value for everyone.

Our mission to drive digitalisation in the Architecture, Engineering, Construction, Operation and Maintenance sector must reflect our focus on concrete results and sustainable benefits.

Our main objective is to create innovative solutions that meet the specific needs of our customers, such as process optimisation, increased productivity and improved user experience so that, with ethics, responsibility and integrity, we build relationships based on trust and mutual respect.

It is with this vision that we will continue to innovate and create opportunities, promoting equity and positive impact in all our actions.

We appreciate the trust placed in us.

Anita Kamong M. S.
